Github: github.com/ManderO9
Portfolio: bit.ly/hossem-portfolio
Location: Larhat, Tipaza, Algeria
Phone: +213 696 22 74 74

Skills:

Backend (Web):

- Asp .Net Core (Minimal APIs, MVC), Django.
- EntityFramework Core, MS SQL Server, PostgreSQL, MySQL, SQLite, MongoDB.
- JWT Authentication, Authorization, Asp Net Core Identity.
- Microservices, Event Sourcing, CQRS, RabbitMQ.
- SignalR, Redis, Unit testing (xUnit).

Frontend (Web):

- Angular, Blazor, React, Vue Js, Bootstrap.
- JavaScript, TypeScript, CSS, Sass, HTML.

Mobile, Desktop and Cross-Platform:

- Flutter, Dart.
- WPF, Xaml, MVVM.:
- Avalonia UI.

Devops:

- Docker, Git, Github Actions, Azure Devops.

Other technologies:

- Linux, Visual Studio, UML, VS Code, Figma.
- Design patterns: MVC, MVVM, Clean Architecture, SPA, PWA.
- Automation with n8n, web scraping, prompt engineering.

Experience:

Work:

Military Service/ June 2025 - May 2026 (1 year)

Company: ANP / Location: DZ - On Site / Full Time

Backend **Asp .Net Core** Developer / February 2025 - May 2025 (4 months)

Company: N’Rich / Location: US - Remote / Full Time

- Developed a backend for an after-school event management app using a microservice architecture with multiple services communicating with each other to handle the app’s functionality.
- Used MassTransit for inter-service communication and SQL Server with EF Core for data persistence.
- Built an api gateway using **YARP** and added load balancing for multiple instances of each microservice.
- Added **authentication** and **authorization** to api gateway using **JWT** tokens.
- Used **swagger** and **scalar** to generate api documentation for frontend devs.

- Used **Azure devops** for collaboration with team members, project management and Azure repos for handling version control.

Full-Stack **Asp .Net Core** and **Angular** Developer / August 2024 - January 2025 (6 months)

Company: TechMind Innovation / Location: UAE - Remote / Full Time

- Maintained a **fintech** application built with **asp .net core** and **Angular**, implementing new features and optimizing existing ones.
- Created a new web app in the domain of **fintech** made with **asp .net core** and **Angular**, used multiple libraries from which: **ClosedXml** for manipulating excel files (reading, generating, importing) and **Hangfire** for scheduling tasks and running background jobs. Used **Typescript, RxJS** and **Material UI** for frontend.
- Implemented **JWT** based **authentication** and **policy based authorization**.
- Used **signalR** for real time communication and updating data on pages without the user needing to refresh them, as well as sending out notifications to the user when certain tasks completed.
- Used **Azure devops** for collaboration with team members, project management and handling version control.

Internships:

WeeWee Delivery \ January 2024 - June 2024 (6 months) :

- Worked on making a backend for a **delivery application** using **Django**, and worked on a mobile UI in **Flutter** and web UI using **Vue Js.**
- Helped with the Design of the app by migrating the existing Firebase Backend into Django, used multiple tools from which: **Python**, **Django**, **SQLite**, Flutter, Vue Js, **Django Rest Framework**, **Redis**.
- Implemented **Authentication and Authorization** for the app using **JWT**.

A-Tech Solutions \ September 2022 (1 month):

- Worked on a CRM/ERP app made with **Asp Net Core**, added new pages and features to the app using tools like: **SQL Server**, **ABP Framework**, **jQuery**, **EF Core** and **Domain Driven Design**.

Personal Projects:

- Nature anime images gallery using **Blazor wasm**, **Sass**, **C#**, **JavaScript**: bit.ly/gallery-anime
- E-Commerce Website, Designed by Anouar Manaa and coded by me from scratch, used **Blazor wasm**, **EntityFramework Core**, **Sass**: bit.ly/o-retail
- Implemented Boids as well as other things using **Blazor wasm**: bit.ly/recreateweb
- Created this Website using **HTML**, **Sass**, **JavaScript**: bit.ly/swift-dash

School Projects:

These projects are group projects where we work as a team of 5/6 to make an app.

- **Microservice** Web App about renting houses, used **Asp Net Core**, **RabbitMQ** and **React**. I implemented user Management microservice, as well as a blob storage microservice (2023).
- Web App about managing Graduation projects. I worked as a frontend developer using: **Vue Js**, **Css**, **HTML**, **JavaScript** (2022).
- Mobile app for taking doctors appointments using **Flutter** and **Firebase** (2021).

Education:

Engineer’s degree in computer science (2019-2024 - 5 years), Higher School of Computer Science (ESI-SBA)

Anything else:

Languages I can speak: English, French, Arabic.
